SUMMARY

Informatics graduate from Telkom University with over 3 years of experience in web application development, specializing in backend development with PHP and Laravel. Skilled in building and maintaining web applications, developing REST APIs, managing relational databases, and implementing frontend features using Vue.js. Experienced in developing healthcare information systems, corporate websites, and internal business applications, with practical knowledge of Linux servers and application deployment.

WORK EXPERIENCE

PikarLabs - Web Developer (Part-Time) **Apr 2020 - Jul 2026**

- Developed and maintained web-based applications for various clients and internal business needs.
- Contributed to the development of a Hospital Information System (SIMRS) to support healthcare operational and administrative processes.
- Developed a Petrokimia company profile website, implementing web features based on the company's requirements and content structure.
- Developed Meducine, a web-based platform for medical webinars and online classes for doctors, supporting event and learning activities.
- Developed and maintained various internal web applications at Pikarlabs, including applications that integrated with external APIs as well as standalone web applications.
- Worked on both backend and frontend development, including feature implementation, database integration, debugging, and application maintenance.
- Collaborated with team members to translate client requirements and business processes into practical web-based solutions.

Telkom University - Student Staff (Part-Time) **Apr 2023 - Jul 2026**

- Developed Student Service Center (SSC), a web-based ticketing and complaint management system to support student service requests and improve the management of academic and administrative inquiries.
- Developed internal tools to support academic document management and administrative processes, helping streamline document-related workflows.
- Contributed to the development of a student queuing application to support the organization and management of student services.
- Assisted in managing and scheduling lecturer educational video recording sessions, helping coordinate schedules and ensure the smooth execution of learning content production.
- Collaborated with academic staff and internal teams to identify operational needs and develop practical technology-based solutions.

PT Aptikma Teknologi Indonesia — Web Developer (Intern) **Jun 2025 - Aug 2025**

- Developed web-based applications using Laravel according to project requirements and specifications.
- Implemented and maintained backend features, including application logic and integration with relational databases.
- Developed and customized application features based on user requirements and project specifications.
- Assisted in testing, debugging, and improving application functionality to ensure the application met project requirements.
- Collaborated with the development team to deliver web-based solutions throughout the project development process.

ACADEMIC & RESEARCH EXPERIENCE

- Participated in various lecturer-led research projects as a student, contributing to the development of web-based applications and digital solutions.
- Contributed to community service (Pengabdian kepada Masyarakat) projects by developing websites to support the needs of partner organizations and communities.
- Assisted in designing, developing, and maintaining websites based on project requirements and user needs.
- Collaborated with lecturers and fellow students throughout the development process, from understanding requirements and implementing features to testing and improving web applications.
- Gained practical experience in applying web development knowledge to real-world academic, research, and community service projects.

EDUCATION

Bachelor of Computer Science **Jul 2022 - Jul 2026**

Telkom University

- Major in Informatics
- Final GPA: 3.90/4.00

SKILLS

BACKEND DEVELOPMENT
PHP • Laravel • Symfony • Filament PHP • Node.js • REST API

FRONTEND DEVELOPMENT
JavaScript • Vue.js • jQuery • HTML • CSS • Bootstrap • Tailwind CSS

DATABASE & CMS
MySQL • PostgreSQL • SQL • Craft CMS • Database Integration

SERVER & TOOLS
Linux • Nginx • Git • Cloudflare • Web Deployment • API Integration

DEVELOPMENT & COLLABORATION
Debugging • Application Maintenance • Requirement Analysis • Problem Solving • Team Collaboration

PROJECTS

Student Service Center (SSC)
Web-based student ticketing and complaint management system.

Meducine
Web platform for medical webinars and online classes for doctors.

SIMRS
Hospital Information System supporting healthcare operational and administrative processes.

Petrokimia Company Profile
Company profile website developed based on client requirements and content structure.

ACHIEVEMENTS

1st Place - PLAYBOX Season 4
Won 1st Place in the Student Start-Up Competition PLAYBOX Season 4 2023

Finalist - Pekan Ilmiah Mahasiswa
Selected as a finalist in the Pekan Ilmiah Mahasiswa competition at Institut Teknologi Telkom Surabaya 2023
